Forecast for Thursday 29 Jul 2021

Weather: Scattered showers spreading from the west this morning, but becoming isolated by afternoon with some sunny intervals developing. Cloud thickening and lowering this evening with outbreaks of rain towards midnight.

Chance of cloud free mountain/hill tops above 800m: 60%, becoming 90% by afternoon.

Visibility: Moderate on higher slopes to begin, with cloud bases 500-600m in association with showers. Generally very good visibility from late morning onwards, with cloud bases near or above the summits.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View
Feels like temperatures could be quite variable through the day. Although any sunny intervals may be pleasant, brisk winds will make it feel much cooler, particularly at height.

Forecast for Friday 30 Jul 2021
Weather: Outbreaks of locally heavy rain through the early hours and at first on Friday. Rain gradually easing to scattered showers by afternoon, these possibly heavy and thundery, but dying out in the evening.

Maximum wind: Northerly 20 gust 30mph early in the day.

Chance of cloud free mountain/hill tops above 800m: 20% becoming 60%.

Visibility: Moderate or poor to start with areas of cloud down to 500m. Becoming good during the day as cloud lifts to 700-900m, but with further reductions in showers.

Temperature: **Valleys:** Plus 12 Celsius, rising to plus 18 Celsius.
At 800m: Plus 7 Celsius, rising to plus 9 Celsius.
Freezing level: Above the summits.
